

- 1. Social Distancing means staying 6 feet away from everybody who does not live in your house.
- 2. We can have a fun understanding of how far 6 feet is and how we can measure it.
- 3. Washing your hands with warm water and soap for 20 seconds every hour is a good idea (except when you are sleeping)!!
- 4. We can measure 20 seconds by saying out ABC's once or singing Happy Birthday two times. We can also time ourselves with other songs too, so we are not singing the same songs ALL THE TIME—especially when it not our birthday.
- 5. We should always wash our hands when we touch any groceries or other things that get delivered to our house. It is just a good idea AND we should make sure our parents do too!
- 6. When we go to the store, everyone should wear a mask that covers their nose and mouth.

Even though school is closed, we are always learning and doing our lessonsjust in different ways with sometimes, our parents as teachers, which is pretty cool.

It is our job to pay Super Attention to the rules and remind everyone to learn them too.
